PROFILE

Design Lead and Product Owner with 6+ years of experience across product design, UX/UI, branding, and digital products. I currently lead the design of enterprise software, working across the full product process from research and discovery through to prototyping, testing, developer handover, and ongoing product improvements. My work focuses on solving user problems, simplifying complex workflows, and balancing user needs with business goals through a clear, research-led design thinking approach. Experienced in collaborative working, workshop facilitation, and delivering accessible, user-centred products in close partnership with developers, stakeholders, and users.

EXPERIENCE

LEAD DESIGNER/PRODUCT OWNER

Legalesign | July 2021 - Present

I lead the design of enterprise agreements and e-signature software, working across the full product process from research and discovery through to UX/UI design, prototyping, testing, and developer handover. Over time, my role expanded into product ownership, taking on greater responsibility across product planning, feature definition, sprint management, and delivery, while continuing to lead all core design responsibilities.

To date, I have designed and delivered 100+ features and workflows across the product, working closely with users, developers, and stakeholders to improve existing experiences and shape new product opportunities. Alongside ongoing product development, I also led a complete company rebrand covering visual identity, messaging, illustration direction, brand systems, and guidelines.

Major projects include:

- A new **Signer Lobby** supporting complex multi-participant document signing workflows
- A redesigned **Dashboard** acting as the central hub of the product
 - A **Mobile Signing App** to focused mobile first Signing and AAA Accessibility
- A **Quick Send Flow** focused on improving onboarding, trial conversion, and reducing churn
- An enterprise **Reporting Platform** providing usage insights and exportable reporting
- A **Bulk Sending Tool** allowing users to mass send documents using CSV uploads
- A **Template Editing System** for reusable document workflows across teams
- An enterprise **Support Hub** for ticket creation, management, and organisation oversight
- A **Workflow Configuration** feature allowing teams and organisation admins to control sending workflows

GRAPHIC DESIGNER

The Young Foundation | July 2020 - JULY 2021

Created visual materials across reports, digital content, templates, illustrations, data visualisation, and website updates. Worked extensively within established brand systems while adapting designs across a variety of audiences, platforms, and communication needs. This role strengthened my skills in visual storytelling, accessibility, and communicating complex information clearly through design.

FREELANCE GRAPHIC DESIGNER

Self-employed | 2019 - 2020

Worked across branding and visual identity projects for a range of clients, creating logos, brand systems, marketing materials, and digital assets. Developed strong experience in client collaboration, strategic brand thinking, and translating business goals into effective visual solutions.

EDUCATION

BACHELOR OF DESIGN (HONOURS) – PRODUCT DESIGN

Glasgow School of Art | 2015 - 2020

Studied product design with a focus on design thinking, research, prototyping, systems thinking, and user-centred problem solving. Developed a structured and evidence-led approach to design that continues to shape my work across digital products and services.

HOW I WORK

STRENGTHS

Product strategy
UX/UI design
User research
Workshop facilitation
Interactive prototyping

APPROACH

Design systems
Stakeholder collaboration
Cross-functional product delivery
Visual design & branding
Accessibility & inclusive design
